Capstone project.

My Capstone project is for college coaches.

My capstone project is a recruiting application that provides a registration and recruiting platform for college coaches for every sport category. The planning process for recruiting has finally become easier to manage by eliminating time consuming steps and enhancing features on the website. My application will be able to display the list of players that are registered in the database for any selected tournament. It will allow easy access to upload the tournament schedules so coaches can have the player's schedule in one platform. Before my application, coaches had to go through hundreds of emails to obtain player's profile information and then assemble this information to coordinate tournament schedule. In order to create this website, I used HTML5, CSS3, JavaScript…..

Elevator Pitch:

Hi, my name is Luidgi Beauzile. I am currently taking the Savvy Coders Full Stack Web Development bootcamp. I am looking for a position as a Junior Web Developer in order to build responsive websites for your company. My capstone project is an application that provides a registration and recruiting platform for college coaches for every sport category. I am an energetic, versatile and dedicated web developer who loves to push codes to GitHub. My hope is to be able to be part of this great organization, so I can utilize my soft and hard skills and bring energy to your team with your consideration. I really appreciate your time and I hope you have a great day.
